PROFESSIONAL SUMMARY

Software Developer with comprehensive training in JavaScript, React, Go, and RESTful API development. Hands-on experience building production-ready applications, including a full-stack financial tracker with data visualization and advanced user interactions. Six years of professional experience has cultivated critical technical skills highly transferable to software development: systematic problem-solving, meticulous attention to detail, debugging complex systems, and working efficiently under pressure with critical deadlines. Strong background in data systems, workflow optimization, and process improvement. Eager to contribute analytical thinking, a strong work ethic, and modern development skills to a forward-thinking tech team.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, Go

Frameworks & Libraries: React, Tailwind CSS, Chart.js

Tools & Technologies: Git, RESTful APIs, JSON, Responsive Design, Vercel, Railway

Development Practices: CRUD operations, Asynchronous programming, DOM manipulation

TECHNICAL PROJECTS

Personal Financial Tracker | React, Go, Tailwind CSS, Chart.js | [Live Site](#) | [GitHub](#)

- Built a full-stack financial management application with React frontend and Go backend, deployed live on Railway
- Implemented interactive dashboard with data visualizations, date filtering, and real-time summary metrics
- Built RESTful API with full CRUD operations, thread-safe caching, and JSON data persistence
- Designed responsive UI with modal-based editing and form validation

Portfolio Website | HTML, CSS, JavaScript | [Live Site](#)

- Built responsive personal portfolio with scroll-triggered animations, parallax effects, and custom cursor
- Deployed to Vercel; showcases projects, skills, and professional background

Outbound Sales Calls Tracker | HTML, CSS, JavaScript | [Live Site](#)

- Built a lightweight activity tracker for logging sales touchpoints with persistent history and reset functionality

WORK HISTORY

Baptist Memorial Hospital – North Mississippi | **1st Shift Generalist** 11/2024 – Present

Oxford, Mississippi

- Leveraged multi-state travel experience to improve facility workflows and operational efficiency
- Identified opportunities for workflow automation and data system improvements

HealthAlliance – UMass Memorial | **Travel MLS Generalist** 07/2024 – 10/2024

Leominster, Massachusetts

- Maintained productivity under limited staffing while improving turnaround times
- Led analyzer system transition using prior instrumentation expertise

OhioHealth – Hardin General Hospital | **Travel MLS Generalist** 04/2024 – 07/2024

Kenton, Ohio

- Rapidly integrated into existing system using prior OhioHealth knowledge; led Cobas analyzer transition

OhioHealth – Marion General Hospital | **Travel MLS Generalist** 04/2023 – 04/2024

Marion, Ohio

- Mentored incoming department lead through position transition
- Led Vista to Cobas Chemistry Analyzer transition

Mercy Hospital – Jefferson Regional | **Travel MLS Generalist** 09/2022 – 04/2023

Crystal City, Missouri

- Generalist across Chemistry, Urinalysis, Hematology, Coagulation, and Blood Bank

Baptist Memorial Hospital – North Mississippi | **Generalist / Hematology Senior Tech** 04/2021 – 09/2022

Oxford, Mississippi

- Promoted to Hematology/Coagulation/Urinalysis Senior Technologist within 6 months
- Implemented LEAN methodology reducing waste and improving departmental efficiency

Baptist Memorial Hospital – Memphis | **2nd Shift Generalist** 10/2019 – 04/2021

Memphis, Tennessee

- Selected as 2nd shift Super User for Vidas 3 chemistry analyzer within first year
- Offered lead tech position upon reaching 2 years of experience

EDUCATION

CourseCareers – Software Development

Mississippi State University

NE Mississippi Community College

AA General Studies • GPA: 3.78

BS Medical Technology • GPA: 3.55

CERTIFICATIONS

- Software Development – CourseCareers [Completed: 2026]
- Front-End Development – Mimo [Obtained: October 2024]
- MLS (ASCP) [Expires: 8/31/2028]
- TN State License [Expires: 1/31/2027]

KEY STRENGTHS

- Rapid Learning: Adapted to different software systems and workflows across seven facilities in five states
- Problem-Solving: Six years of systematic troubleshooting complex technical systems under high-pressure conditions
- Attention to Detail: Maintained data accuracy in high-stakes environments requiring zero-error tolerance
- Process Improvement: Implemented LEAN methodology for workflow optimization and efficiency gains
- Work Ethic: Completed intensive software development training while working full-time 12-hour shifts
- Leadership: Promoted to supervisory role within 6 months; selected as technical Super User early in career
